Foreword

Editor's Neuroscience Edition Preface

Classical Hypnotic Phenomena I: Psychodynamics

I: Amnesia

1. The investigation of a specific amnesia
2. Development of apparent unconsciousness during hypnotic reliving of a traumatic experience
3. Clinical and experimental observations on hypnotic amnesia: Introduction to an unpublished paper
4. The problem of amnesia in waking and hypnotic states
5. Varieties of hypnotic amnesia

II. Literalness

6. Literalness: An experimental study
7. Literalness and the use of trance in neurosis

III: Age Regression Introduction

8. Age regression: Two unpublished fragments of a student's study
9. Past weekday determination in hypnotic and waking states
10. On the possible occurrence of a dream in an eight-month-old infant
11. The successful treatment of a case of acute hysterical depression by a return under hypnosis to a critical phase of childhood

IV: Automatic Writing and Drawing

12. The experimental demonstration of unconscious mentation by automatic writing
13. The use of automatic drawing in the interpretation and relief of a state of acute obsessional depression
14. The translation of the cryptic automatic writing of one hypnotic subject by another in a trancelike dissociated state

V: Mental Mechanisms

15. Experimental demonstrations of the psychopathology of everyday life
16. Demonstration of mental mechanisms by hypnosis
17. Unconscious mental activity in hypnosis-psychoanalytic implications
18. Negation or reversal of legal testimony

VI: Dual Personality

19. The permanent relief of an obsessional phobia by means of communication with an unsuspected dual personality
20. The clinical discovery of a dual personality
21. Findings on the nature of the personality structures in two different dual personalities by means of projective and psychometric tests

VII: The Implicit Processing Heuristics Scale

22. The Implicit Processing Heuristic Scale
