Foreword

Editor's Neuroscience Edition Preface

I. Memory and Hallucination

1. Memory and Hallucination Part 1, Ernest Rossi
2. Memory and Hallucination Part 2, Ernest Rossi

II. Visual Processes

3. The hypnotic induction of hallucinatory color vision followed by pseudonegative afterimages (written with E. M Erickson)
4. Discussion: Critical comments on Hibler's presentation of his work on negative afterimages of hypnotically induced hallucinated colors (written by E.M. Erickson)
5. The induction of color blindness by a technique of hypnotic suggestion
6. An experimental investigation of the hypnotic subject's apparent ability to become unaware of stimuli
7. The development of an acute limited obsessional hysterical state in a normal hypnotic subject
8. Observations concerning alterations in hypnosis of visual perceptions (written by E.M. Erickson)
9. Further observations on hypnotic alteration of visual perception (written by E.M. Erickson)
10. An investigation of optokinetic nystagmus
11. Acquired control of pupillary responses

III. Auditory Processes

12. A study of clinical and experimental findings on hypnotic deafness: I. Clinical experimentation and findings
13. A study of clinical and experimental findings on hypnotic deafness: II. Experimental findings with a conditioned re-sponse technique
14. Chemo-anaesthesia in relation to hearing and memory
15. A field investigation by hypnosis of sound loci importance in human behavior

IV. Time Distortion

16. Time distortion in hypnosis, I (written by L. F. Cooper)
17. Time distortion in hypnosis, II (written with L. F. Cooper)
18. The clinical and therapeutic applications of time distortion
19. Further considerations of time distortion: Subjective time condensation as distinct from time expansion (written with E. M. Erickson)

V. Explorations in Hypnosis Research

20. Explorations in hypnosis research (with a discussion by T. X. Barber, R. Dorcus, H. Guze, T. Sarbin, and A. Weitzenhoffer)
21. Basic psychological problems in hypnotic research
