Foreword

Editor's Neuroscience Edition Preface

I. Erickson's Pioneering Approaches to Mind-Body Healing

1. Hypnotic investigation of psychosomatic phenomena: Psychosomatic interrelationships studied by experimental hypnosis
2. Hypnotic investigation of psychosomatic phenomena: The development of aphasia-like reactions from hypnotically induced amnesias. Written with R. M. Brickner
3. Hypnotic investigation of psychosomatic phenomena: A controlled experimental use of hypnotic regression in the therapy of acquired food intolerance,
4. Experimentally elicited salivary and related responses to hypnotic visual hallucinations confirmed by personality reactions
5. Control of physiological functions by hypnosis
6. The hypnotic alteration of blood flow: An experiment comparing waking and hypnotic responsiveness. Unpublished manuscript
7. A Clinical experimental approach to psychogenetic infertility
8. Breast development possibility influenced by hypnosis: Two instances and the psychotherapeutic results.
9. Psychogenic alteration of menstrual functioning: Three instances.
10. The appearance in three generations of an atypical pattern of the sneezing reflex.
11. An addendum to a report of the appearance in three generations of an atypical pattern of the sneezing reflex.

II Erickson's Innovative Approaches to Pain Resolution

12. An introduction to the study and application of hypnosis for pain control
13. The therapy of a psychosomatic headache
14. Migraine headache in a resistant patient
15. Hypnosis in painful terminal illness
16. Hypnotic training for transforming the experience of chronic pain

III. Erickson's Pioneering Approaches in Rehabilitation

17. Hypnotically oriented psychotherapy in organic brain damage
18. Hypnotically oriented psychotherapy in organic brain disease: An addendum
19. An application of implications of Lashley's researches in a circumscribed arteriosclerotic brain condition
20. Experimental hypnotherapy in a speech problem:
21. Provocation as a means of motivating recovery from a cerebrovascular accident

IV. Psychosocial Genomics of Mind-Body Healing for Rehabilitation

22. Psychosocial Genomics: Gene Expression, Neurogenesis, and Human Experience in Mind-Body Medicine.
23. Stress-Induced Alternative Gene Splicing in Mind-Body Medicine.
24. Gene Expression, Neurogenesis, and Healing: Psychosocial Genomics of Therapeutic Hypnosis
25. The Bioinformatics of Psychosocial Genomics in Alternative and Complementary Medicine.
26. A Bioinformatics Approach to the Psychosocial Genomics of Therapeutic Hypnosis.
27. The Memory Trace Reactivation and Reconstruction Theory of Therapeutic Hypnosis: The Creative Replaying of Gene Expression and Brain Plasticity in Stroke Rehabilitation.
